7 years of experience in Startups, Healthcare, SaaS, and E-commerce.

RECENT EXPERIENCE

UX/UI designer at Dechea — dental practice management software

Jun 2021 - Mar 2024

- Designed a workflow that increases patient health state documentation and therapy estimation, resulting in a 30% reduction in appointment time, leading to more patients per day.

- Designed an advanced automation system for cost estimation. With this system in place, the cost estimator's job can now be executed automatically with confidence and without any manual intervention.

- Created teeth diagram that increases the range of medical findings compared to competitors, resulting in increased detail and accuracy of documentation and cost estimation of services.

- Learned how to develop UI with different frameworks like Reshaped, Chakra and Skeleton to speed up development to help save time and money for a startup.

UI designer at Nokeep — A platform for renting items

May 2023 — Present

- Designed comprehensive and accessible design system that streamlined the UI consistence, significantly enhancing collaboration among designers and developers and improving the product quality.

- Since we're using Tailwind CSS for development I've provided Tailwind dimensions in Figma so that developers don't have to calculate values from pixel to Tailwind values. They just see the code in Figma that they need to copy.

- I've provided every possible state of the interface, from components to workflow states (loading, error, empty states, success cases, and so on). I demonstrated the behaviour of the interface for different screen sizes with all possible breakpoints. I also considered content variability such as text length.

SKILLS AND EXPERTISE

- UX research
  - User interview
  - Concepts ideation (Preferring [Shape Up](#) approach)
  - Competitor analysis
  - Information architecture
  - Usability testing
- Prototyping
- High-quality UI design deliveries
- UI Development
  - HTML/CSS development using frameworks like Reshaped, Chakra, Skeleton or a utility-first CSS framework TailwindCSS
  - Webflow, Framer
- Design system
  - Foundation (colors, typography, icons, spacing, design-tokens)
  - Components
  - Documentation (guidelines, rules for accessibility)
- MidJourney

OTHER NOTABLE WORK

I am the creator of the [Skeleton Figma Component Library](#) for the Skeleton framework. Over **2700 users** already use this library.

EDUCATION

Ukrainian academy of Printing, Master's degree
